

Gibson origin Re-TRAC sheet

2026-09-03. One origin. Buyer file, not a git clone.

On Gibson origin-facility-quarter cells, do last year’s same-quarter shipments beat mileage-plus-population on held-out 2024?

Last year wins Gibson assignment on the intersection: RMSE 28.1 tons against mileage-plus-population 29.9 (n=8). Last year loses the observed Gibson quarterly total: RMSE 52.8 against bar 0.0 (n=4). The bar is scaled to the observed Gibson quarterly total, so origin-total bar RMSE is 0 by construction. Do not average the two answers. Origin population cancels inside one origin’s shares.

Statewide baseline citation, parent 5800fc3: last year wins assignment on intersection cells (RMSE 6504.7 vs 16633.0, n=4370); last year loses origin-quarter totals (23313.3 vs 0.0, bar scaled to the observed county total). That lock’s Gibson row used statewide facility set J: last-year RMSE 15597 vs bar 76281; holdout tons 1540946; n=35. This sheet restricts J to Gibson train-era destinations. Do not promote the statewide win.

Fixture coordinates are planted lon/lat. Live CRS is logged on the buyer sheet.

Residuals stay residual. Miles are great-circle, not road miles. n_point=2, n_centroid=1 on the Gibson destination set. 2024-only facilities have bar mass 0. Out-of-state origins are dropped. Confirmation 2025 is out of train and out of J; it does not reopen this sheet.

Gibson 2024 reported cells

Q	ID	Facility	2023 tons	2023 share	2024 tons	2024 share	Residual	Bar share	Loc
1	26-06	Near Fill	78.7	79.42%	119.6	77.80%	40.9	98.42%	point
4	26-06	Near Fill	79.5	79.77%	119.4	77.75%	39.9	98.42%	point
2	26-06	Near Fill	85.0	82.12%	119.0	77.62%	34.0	98.42%	point
3	26-06	Near Fill	80.3	80.15%	118.4	77.45%	38.1	98.42%	point
3	84-06	Far Fill	19.9	19.85%	30.5	19.93%	10.6	1.58%	point
2	84-06	Far Fill	18.5	17.88%	30.3	19.77%	11.8	1.58%	point
4	84-06	Far Fill	20.2	20.23%	30.2	19.65%	10.0	1.58%	point
1	84-06	Far Fill	20.4	20.58%	30.1	19.60%	9.7	1.58%	point
1	10-01	New Fill			4.0	2.60%			centroid
2	10-01	New Fill			4.0	2.61%			centroid
3	10-01	New Fill			4.0	2.62%			centroid
4	10-01	New Fill			4.0	2.60%			centroid

Bar share is on the intersection only (last year present). Bar-on-all-reported-Gibson-cells is a second line in the JSON, not mixed into the win.

Figures

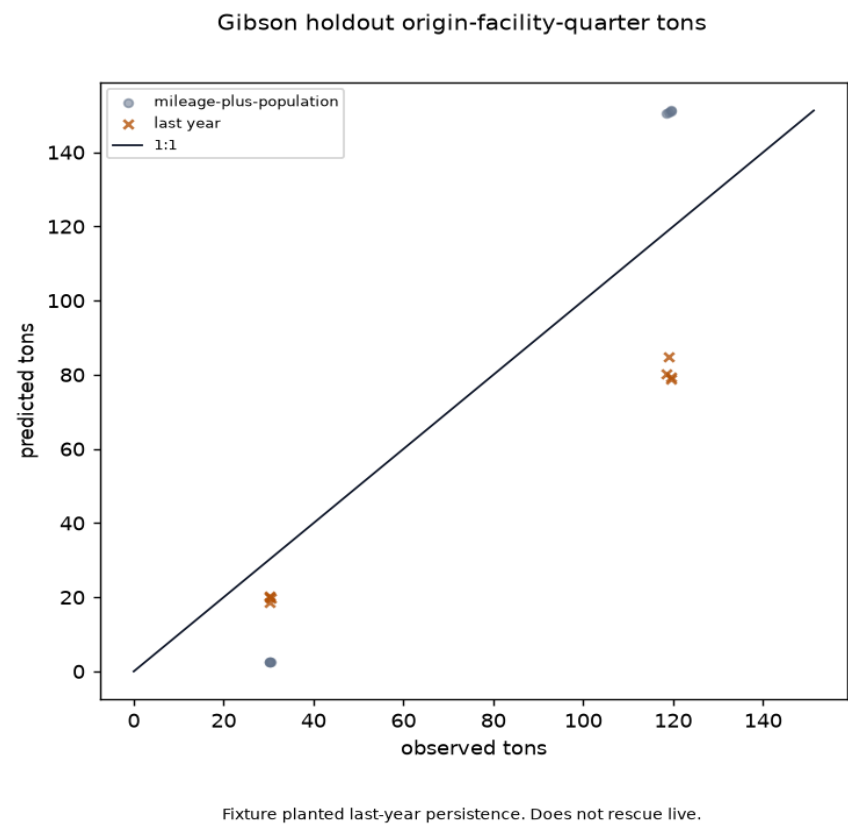

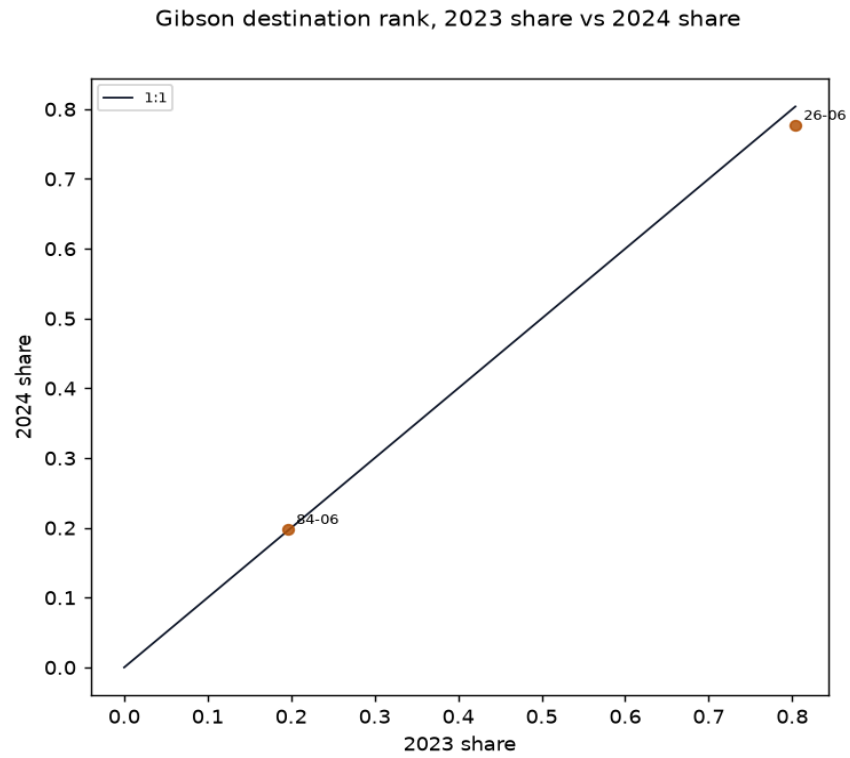

Figure 1. Gibson holdout cells. Last year vs mileage-plus-population. Tons of error.

Fixture destination shares. Does not rescue live.

Figure 2. 2023 share versus 2024 share by receiving facility. Rank of plants.
